SENDING YOUR CORE TO CHOATE

When you're ready to send in your core, it's important to make sure that all fluids have been drained, the core has been shrink-wrapped, and it's securely strapped to the pallet and crate provided. Additionally, you are required to submit images of your core to a customer service representative before a shipping BOL can be provided to you., Please make sure to include the laminated pallet ID card that was stapled to the pallet when you received your engine. This will help Choate process your core return in a timely and efficient manner.
